

Frontiers for Young Minds

Science for kids, edited by kids

Frontiers for Young Minds is an award-winning, non-profit, open-access scientific journal for kids. Our mission is to inspire the next generation with high-quality, free-to-read science. And we go further: to engage and develop the scientists of the future, we empower Young Reviewers, aged 8–15, to directly shape the science from top authors—including Nobel Prize winners—by acting as peer-reviewers, ensuring everything we publish is accessible and fun-to-read for their peers.

"I hope the papers in this journal may help nourish and reinforce children's passion and curiosity for science—what a gift to humanity that would be!"

Prof. May-Britt Moser,
Nobel Laureate

"I can help out real scientists: that's really rewarding for me when they release an article, because I feel that I've made a contribution to the community."

Ray, aged 15,
Young Reviewer
